

Conversions Audit

A Conversions Audit is an in-depth review of your online properties to determine what areas need improvement or refinement to convert visitors into actual leads for your products and services.

Inquiries come through to your business from contact forms, calls, emails, data messages, direct purchases, requests for more info, etc. These essentially are your **Leads** and ultimately can result in new **Clients**.

DIT Web Solutions will:

1. Review multiple conversion points
2. Review of your website or Landing Page
3. Review up to 2 paid campaigns on Google, Facebook, or LinkedIn
4. Review of up to 3 Social Media platforms
5. Review of NAP (Name, Address, Phone #) across online directories, citations, etc.
6. Review of your basic email funnel or newsletters
7. Provide a full report of the Findings & Recommendations

Companies pay thousands to improve their conversions, and this offer usually costs about \$2500.

Because we want to invest in expanding businesses to their full potential, this comprehensive review is being offered at the incredible price of **\$350**.

This low price is subject to change at any time, so don't miss out on this opportunity. Contact us today to get this going for you.
